**Importance:** High

Dear [REDACTED]

Please find attached a copy of our recommendation in respect of the agricultural barns at Treguddick Farm. As we discussed, given the barns would ordinarily fall within permitted development rights, National Highways considers it could not sustain an objection to the development. However, we are requesting further information to enable us to better understand likely construction traffic movements which will then inform appropriately worded planning conditions.

I would be grateful if you could forward our comments to the applicant and their agents.

If anything is unclear or if you wish to discuss please don't hesitate to contact me.

Please note I have also separately sent the response for each application to the generic Cornwall Council planning in box.

Kind regards

[REDACTED]
