

H689 – LAND OFF FIDDINGTON LANE, ASHCHURCH

FILE NOTE DEALING WITH NATIONAL HIGHWAYS PLANNING RESPONSE DATED 20 DECEMBER 2022 (PLANNING APPLICATION: 22/01320/OUT)

1. Introduction

- 1.1. This file note has been produced by PFA Consulting in response to National Highways Planning Response to Tewkesbury Borough Council (TBC) dated 20 December 2022, in relation to planning application 22/01320/OUT for residential development on land off Fiddington Lane. A copy of National Highways response is reproduced at **Appendix A**.
- 1.2. National Highways has recommended that the planning application not be granted for a period of up to 3-months pending the submission and review of additional information from the applicant.
- 1.3. This report provides the additional information requested by National Highways.

2. Trip Generation

- 2.1. National Highways has queried the robustness of the trip generation provided for the proposed development and have requested further evidence be provided to demonstrate the suitability of the trip rates used in the traffic modelling.
- 2.2. For the proposed residential development the TA has used vehicular trip rates derived from the TRICS database using comparable sites. The use of 'Houses Privately Owned' trip rates is considered a 'robust' assessment given that at least 30% of the total residential units will be for affordable housing in accordance with Core Policy SD12 of the adopted JCS.
- 2.3. The residential vehicular trip rates used to establish the traffic generation of the proposed development are consistent with those provided within the TA scoping study which was issued to National Highways for approval. In response to the TA scoping study concerning the proposed traffic generation National Highways stated:

“Vehicular trip generation for the proposed residential development has been calculated for both the AM and PM peak hours using the TRICS database. It is proposed development will generate 88 two-way vehicle trips in the AM peak and 87 two-way vehicle trips in the PM peak. We have undertaken our independent TRICS exercise and we can confirm that the above trip generation values are acceptable.”

- 2.4. At the time of the TA scoping it was anticipated that the proposed development would be for 170 dwellings; this was subsequently reduced to 120 dwellings due to on-site constraints. This reduction in dwelling numbers has resulted in a reduction to the traffic generation; Table 5.7 of the TA shows that the proposed development will generate 62 two-way vehicle trips in the AM peak hour and 61 two-way vehicle trips in the PM peak hour. Importantly, the trip rates used to derive the traffic generation reflects those previously agreed by National Highways as part of the TA scoping exercise.

3. S-Paramics Model Files

- 3.1. National Highways have requested the S-Paramics model files in order to check and confirm the input data and output reporting. Copies of the S-Paramics model files will therefore be provided to National Highways by email via file transfer.

4. Retail Outlet Centre Roundabouts

- 4.1. National Highways has requested evidence that the recently constructed roundabouts serving the retail outlet centre would not adversely impact upon the operation of the A46(T).
- 4.2. The S-Paramics traffic modelling includes the infrastructure associated with the retail outlet centre and other committed developments as part of its modelled highway network; this includes the internal spine road through the retail development connecting the two roundabouts as shown on drawing no. H689/01 at **Appendix B**.
- 4.3. To provide National Highways with the comfort that these two roundabouts would operate within capacity and would not adversely impact the operation of the A46(T), Junctions 10 capacity assessments have been undertaken for the 2024 and 2031 assessment years with the inclusion of the proposed development.
- 4.4. The results of the standalone Junctions 10 capacity assessments for the weekday AM and PM peak hours using the traffic flows output from the S-Paramics modelling for Scenarios 3 & 5 are provided below for both the eastern and western roundabout junctions serving the retail outlet centre.

Retail Outlet Centre Eastern Roundabout on Fiddington Lane

- 4.5. **Tables 4.1 and 4.2** set out the 'Junctions 10' results for the Retail Outlet Centre Eastern Roundabout on Fiddington Lane for both the weekday AM and PM peak hours respectively.

Table 4.1: Retail Outlet Centre Eastern Roundabout AM Peak Hour Junctions 10 Results

Scenario		Approach	Max Queue (vehicles)	Max Delay (sec/veh)	Max RFC
3	2024 Opening Year + Committed Development + Proposed Development on Land off Fiddington Lane (120 dwellings)	Fiddington Lane (N)	0.1	3.13	0.08
		Fiddington Lane (S)	0.1	3.80	0.11
		Retail Outlet Centre Access	0.2	4.16	0.19
5	2031 Opening Year + Committed Development + Proposed Development on Land off Fiddington Lane (120 dwellings)	Fiddington Lane (N)	0.1	3.14	0.09
		Fiddington Lane (S)	0.1	3.77	0.11
		Retail Outlet Centre Access	0.2	4.13	0.18

Table 4.2: Retail Outlet Centre Eastern Roundabout PM Peak Hour Junctions 10 Results

Scenario		Approach	Max Queue (vehicles)	Max Delay (sec/veh)	Max RFC
3	2024 Opening Year + Committed Development + Proposed Development on Land off Fiddington Lane (120 dwellings)	Fiddington Lane (N)	0.1	3.20	0.12
		Fiddington Lane (S)	0.1	3.59	0.08
		Retail Outlet Centre Access	0.2	3.97	0.15
5	2031 Opening Year + Committed Development + Proposed Development on Land off Fiddington Lane (120 dwellings)	Fiddington Lane (N)	0.1	3.18	0.12
		Fiddington Lane (S)	0.1	3.58	0.09
		Retail Outlet Centre Access	0.2	3.96	0.15

- 4.6. The results show that the Retail Outlet Centre Eastern Roundabout on Fiddington Lane would operate within capacity in both scenarios during both the weekday AM and PM peak hours. The 'Junctions 10' output report is included at **Appendix C**.

Retail Outlet Centre Western Roundabout south of Alexandra Way

4.7. Tables 4.3 and 4.4 set out the 'Junctions 10' results for the Retail Outlet Centre Western Roundabout for both the weekday AM and PM peak hours respectively.

Table 4.3: Retail Outlet Centre Western Roundabout AM Peak Hour Junctions 10 Results

Scenario		Approach	Max Queue (vehicles)	Max Delay (sec/veh)	Max RFC
3	2024 Opening Year + Committed Development + Proposed Development on Land off Fiddington Lane (120 dwellings)	Retail Outlet Centre	0.0	2.26	0.03
		Fiddington Residential	0.6	3.80	0.36
		Dobbies Garden Centre	0.0	3.67	0.01
		Link to A46(T)	0.2	2.11	0.16
5	2031 Opening Year + Committed Development + Proposed Development on Land off Fiddington Lane (120 dwellings)	Retail Outlet Centre	0.0	2.26	0.03
		Fiddington Residential	0.6	3.81	0.36
		Dobbies Garden Centre	0.0	3.67	0.01
		Link to A46(T)	0.2	2.10	0.17

Table 4.4: Retail Outlet Centre Western Roundabout PM Peak Hour Junctions 10 Results

Scenario		Approach	Max Queue (vehicles)	Max Delay (sec/veh)	Max RFC
3	2024 Opening Year + Committed Development + Proposed Development on Land off Fiddington Lane (120 dwellings)	Retail Outlet Centre	0.2	3.10	0.19
		Fiddington Residential	0.2	3.15	0.16
		Dobbies Garden Centre	0.1	3.70	0.08
		Link to A46(T)	0.4	2.45	0.31
5	2031 Opening Year + Committed Development + Proposed Development on Land off Fiddington Lane (120 dwellings)	Retail Outlet Centre	0.2	3.07	0.19
		Fiddington Residential	0.2	3.16	0.17
		Dobbies Garden Centre	0.1	3.70	0.08
		Link to A46(T)	0.4	2.45	0.31

4.8. The results show that the Retail Outlet Centre Western Roundabout would operate within capacity in both scenarios during both the weekday AM and PM peak hours. The 'Junctions 10' output report is included at **Appendix D**.

APPENDICES

National Highways Planning Response (NHPR 22-12) Formal Recommendation to an Application for Planning Permission

From: Andrew Jinks (Regional Director)
Operations Directorate
Midlands Region
National Highways
PlanningM@nationalhighways.co.uk

To: **Tewkesbury Borough Council- FAO:** [REDACTED]
developmentapplications@teWKesbury.gov.uk

CC: transportplanning@dft.gov.uk
spatialplanning@nationalhighways.co.uk

Council's Reference: 22/01320/OUT

Location: Parcel 5558, Road from Natton to Homedowns, Ashchurch

Proposal: Residential Development, associated works including infrastructure, open space and landscaping. Vehicular access from Fiddington Lane.

National Highways Ref: 97005

Referring to the consultation on a planning application dated 08.12.2022, referenced above, in the vicinity of the M5 and A46 that forms part of the Strategic Road Network, notice is hereby given that National Highways' formal recommendation is that we:

Recommend that planning permission not be granted for a specified period (see reasons at Annex A);

This represents National Highways' formal recommendation and is copied to the Department for Transport as per the terms of our Licence.

Should the Local Planning Authority not propose to determine the application in accordance with this recommendation they are required to consult the Secretary of State for Transport, as set out in the [Town and Country Planning \(Development Affecting Trunk Roads\) Direction 2018](#), via transportplanning@dft.gov.uk and may not determine the application until the consultation process is complete.

The Local Planning Authority must also copy any consultation under the 2018 Direction to PlanningM@nationalhighways.co.uk.

The Cube, Birmingham, B1 1RN

Annex A National Highways' assessment of the proposed development

National Highways has been appointed by the Secretary of State for Transport as a strategic highway company under the provisions of the Infrastructure Act 2015 and is the highway authority, traffic authority and street authority for the Strategic Road Network (SRN). The SRN is a critical national asset and as such we work to ensure that it operates and is managed in the public interest, both in respect of current activities and needs as well as in providing effective stewardship of its long-term operation and integrity.

This response represents our formal recommendation regarding 22/01320/OUT and has been prepared by Neil Hansen.

Our initial comments are set out below::

The trip generation provided for the proposed development are not considered to have been robustly derived and further evidence is required to demonstrate the suitability or otherwise of the trip rates.

In order to verify the model output we will need to have the S PARAMICS files to check and confirm the input data and output reporting.

The individual junction capacity assessments cover the appropriate junction and make use of previously agreed models for the junctions being assessed. Therefore, although the models are likely to be correctly built, until the traffic flows have been verified in terms of appropriate trip rates and S PARAMICS outputs the conclusions of the capacity assessments cannot be confirmed.

Evidence is required to demonstrate that newly constructed roundabout serving the retail outlet centre and linking with Fiddington Lane will not adversely impact upon the operation of the A46(T).

National Highways requests the provision of the S PARAMICS files so that a robust review can be undertaken of the inputs and reporting. Confirmation that the traffic signal timings used are appropriate will also be required. A further set of trip rates are requested to ensure that the ones proposed and used in the assessment to date are sufficiently robust.

Recommendation

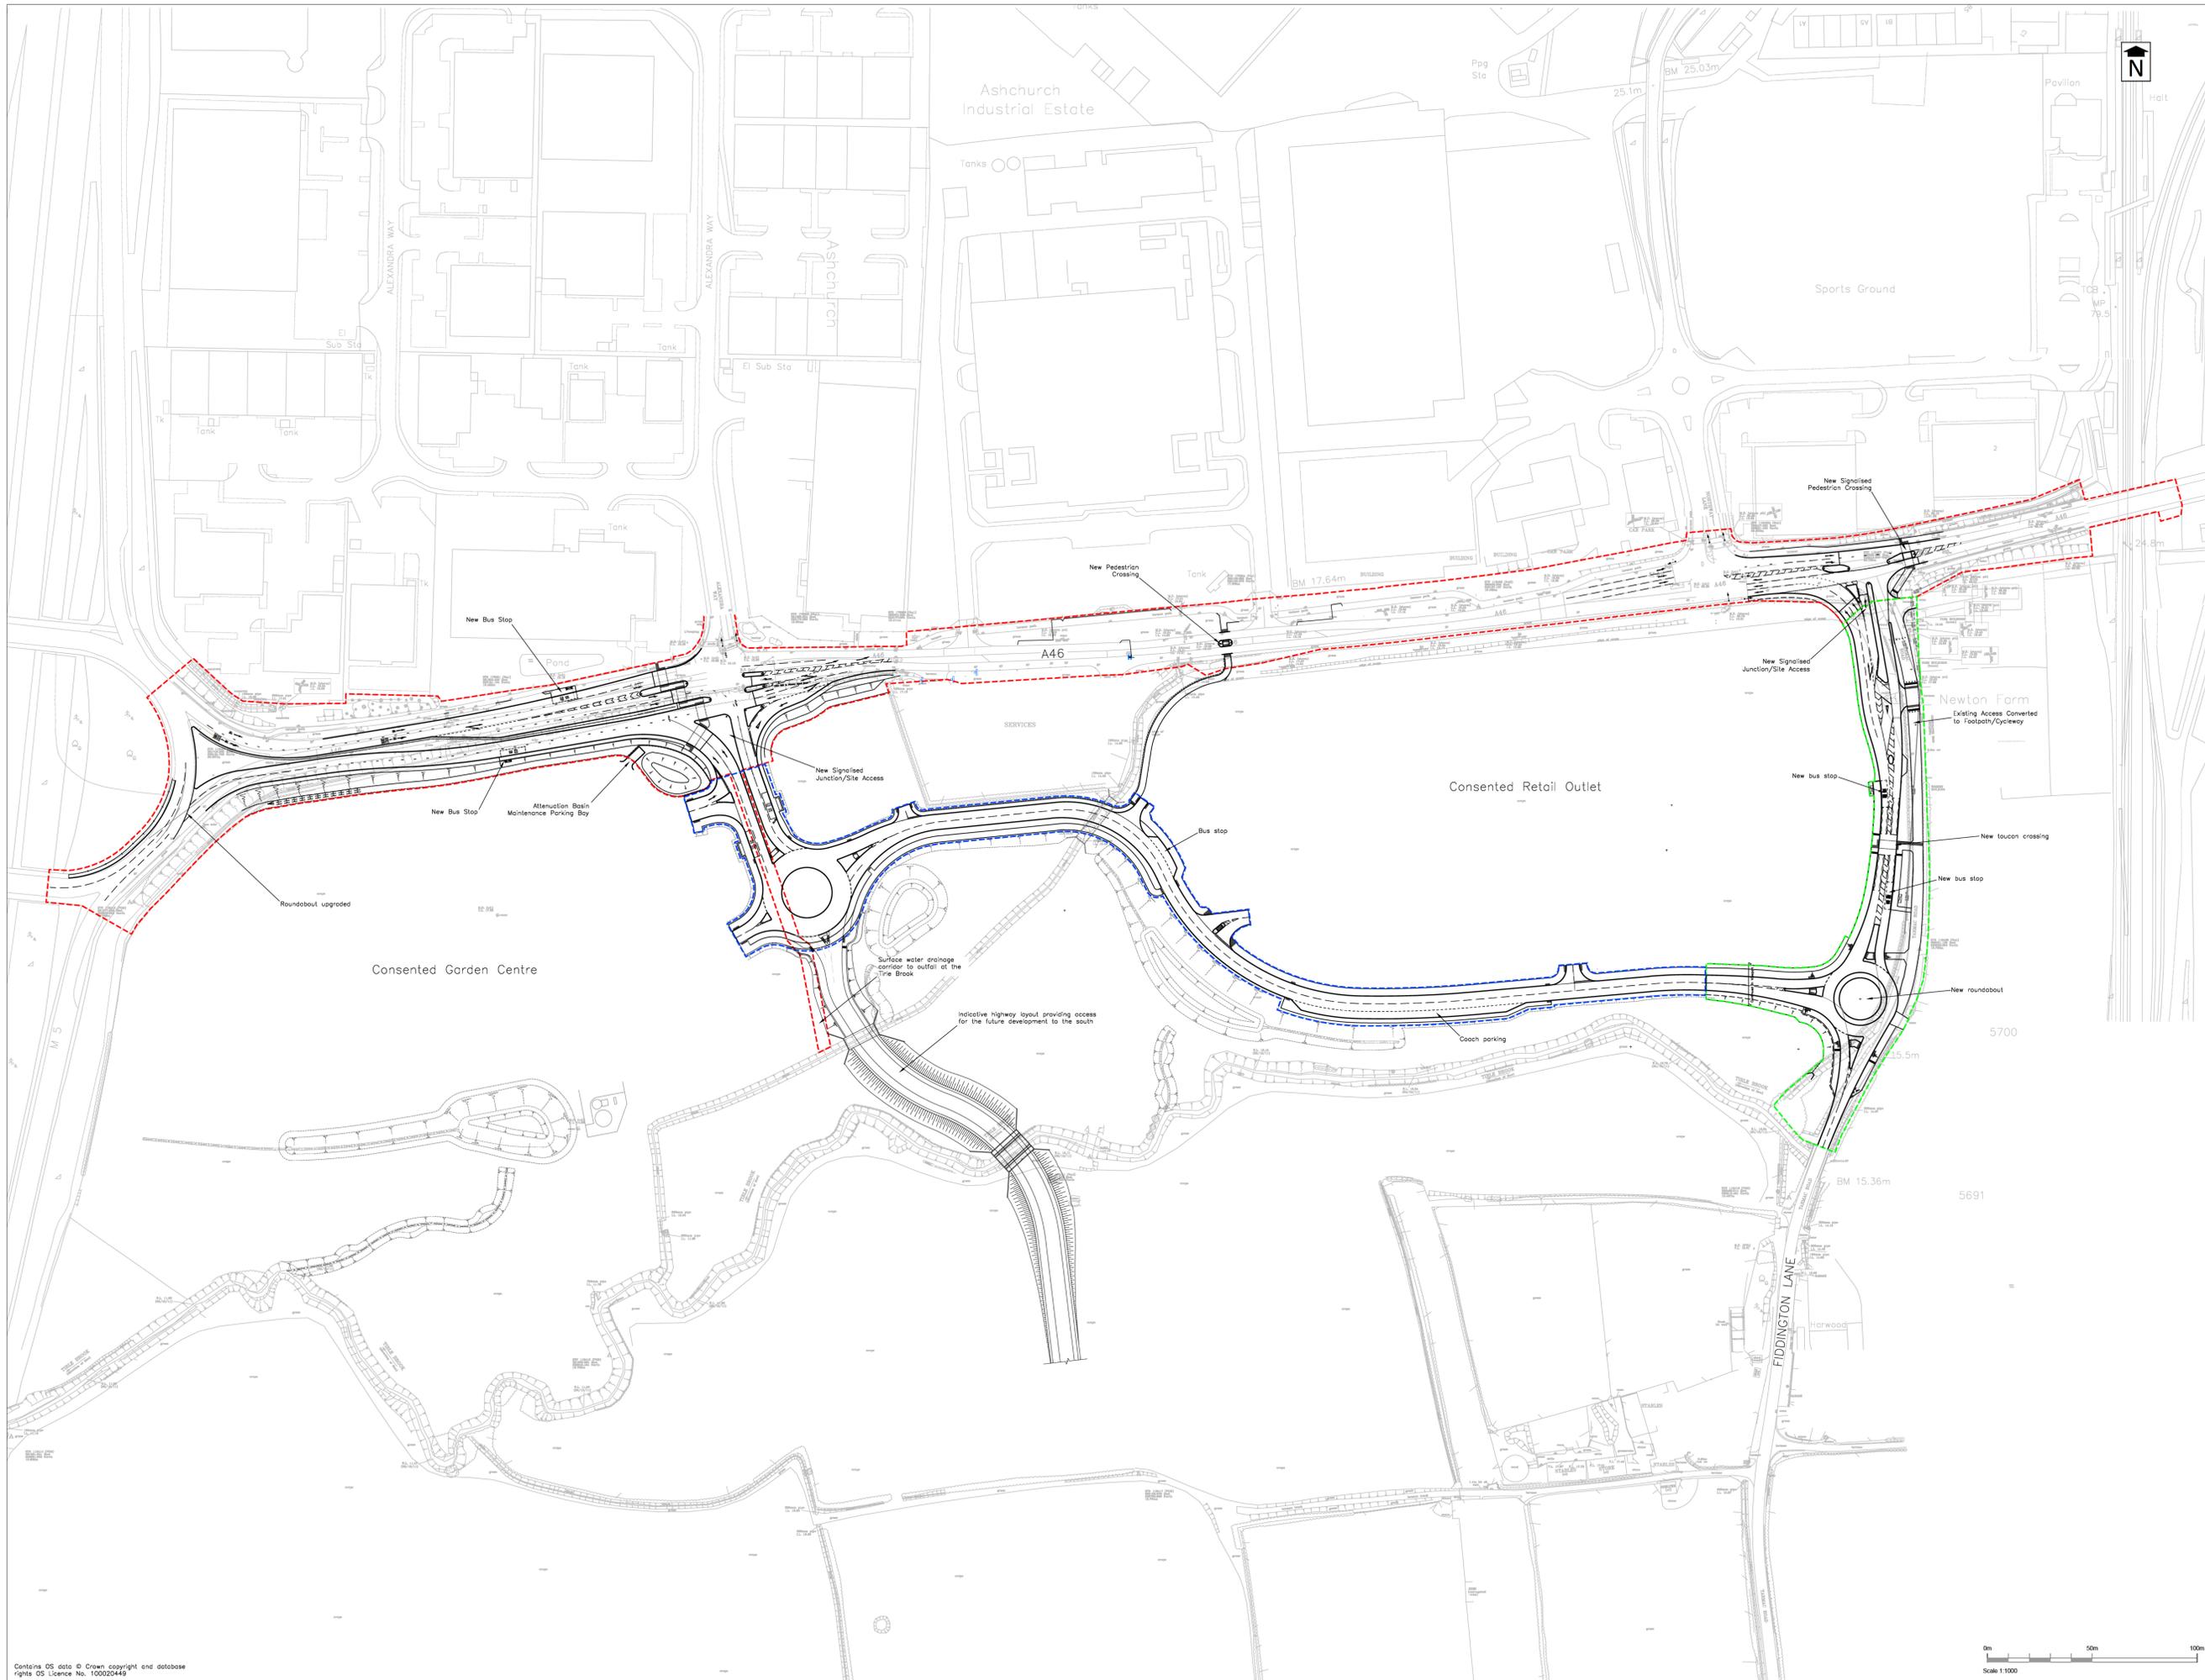

Considering the above, National Highways recommends that planning permission not be granted for a period of up to three months from the date of this response to allow for sufficient time for the applicant to provide further information and for National Highways to review and respond to information provided.

Standing advice to the local planning authority

The Climate Change Committee's [2022 Report to Parliament](#) notes that for the UK to achieve net zero carbon status by 2050, action is needed to support a modal shift away from car travel. The NPPF supports this position, with paragraphs 73 and 105 prescribing that significant development should offer a genuine choice of transport modes, while paragraphs 104 and 110 advise that appropriate opportunities to promote walking, cycling and public transport should be taken up.

Moreover, the build clever and build efficiently criteria as set out in clause 6.1.4 of [PAS2080](#) promote the use of low carbon materials and products, innovative design solutions and construction methods to minimise resource consumption.

These considerations should be weighed alongside any relevant Local Plan policies to ensure that planning decisions are in line with the necessary transition to net zero carbon.
