

Severn Bridge (M48 J1-2)

Crossing closed to all traffic when winds exceed 40 knots - Implementing closures

- a. Set VSS to show full closure
- b. TOs shall close cone the slip road and resume.
 - From J2 TOs have exemption to travel back across the M48 Bridge.
 - If deemed unsafe alternative routes can be used once discussed with the Duty TM.
- c. If using the M48 Westbound Southwest Trunk Road Agent (SWTRA) /Traffic Wales shall be informed
- d. If TOs identify an incident, make the scene safe and inform the ROC.
 - Wait until appropriate support arrives.

Opening of crossing – winds below 40 knots

- a. Deploy a TO to complete a check of the carriageway for obstructions prior to re-opening.
- b. 22:00 – 06:00 – TTM shall keep J1 closure in place,
 - check the 'A' Carriageway and where possible, check the opposite carriageway
 - once VSS have been adjusted remove the closure at J2
 - consider a RRB on the Eastbound carriageway to confirm no obstructions or debris.
 - remove the TTM at J1, informing the ROC once resumed from scene
- c. 06:00 – 22:00 – A TO or TM will be tasked to do a check of the carriageway for obstructions prior to re-opening.
 - A TOV to be at J1 access slip ready to open
- d. 09:30 – 22:00 – A TOV to be at J2 access slip ready to open.

| Wind speed | Action required |
|-----------------------------|---|
| Winds have reached 30 knots | <ol style="list-style-type: none">1. Invoke the action plan Southwest M48 Bridge – Gusts above 34_6mph (40 Matrix)2. Set Action Plan Southwest M48 – 40MPH Speed Restrictions3. If gusts are likely to exceed 40 knots within the next hour, contact weather service provider for weather update. |
| Winds have reached 35 knots | <ol style="list-style-type: none">1. Update the incident log and Southwest M48 Gusts above 40_3mph (Leeward Lanes)2. Set signal Southwest M48 Leeward Lane Closure –<ol style="list-style-type: none">1. Selecting either Downstream or Upstream |
